

WHAT IS CLAIMED IS:

1. A stretchable raschel-type warp knit fabric
formed of a ground structure of polytrimethylene
terephthalate fiber combined with elastomeric fiber laid
in, wherein the knit fabric has the number of courses in
a range from 100 to 200 courses per 2.54 cm, and a
product of the number of courses and the number of wales
per 2.54 cm is in a range from 4,000 to 8,000.

2. A stretchable raschel-type warp knit fabric as
defined by claim 1, wherein the knit fabric is of a satin
net structure.

3. A stretchable raschel-type warp knit fabric as
defined by claim 1 or 2, wherein the elastomeric fiber is
of a polyurethane type.
